## HARLINGEN SEAPORT

### Company

Windpowercentre is an independent facilitating company for the offshore industry.

Windpowercentre offers a perfect site for assembly, revision, service and maintenance of wind turbines and other offshore equipment.

The maintenance building has a 50 ton crane, with a lifting hook at an altitude of 7 metres for handling the most recent turbines and parts.

The 30000 m2 outdoor storage can easily be reached by extreme long and heavy transports.

Windpowercentre offers a wide range of facilities and activities together with third parties.

### Place

Windpowercentre is sited in Harlingen's new seaport, in northern part of the Netherlands, at a one hour drive from Schiphol Airport.

Harlingen seaport is very well situated for potential Dutch and German offshore windpark sites.

Harlingen is also a very good starting point for service and maintenance in the northern part of the Netherlands.

Due to its site, the harbour is very suitable for importing and exporting large wind turbines.

### Facilities

- Several 2 to 3 person full service offices
- Presidential office with view to the see.
- Meeting and presentation room for about 20 persons
- Maintenance and revision place 300 m2 (50 ton crane)
- Indoor storage sized 2 x 100 m2
- Outdoor storage 30.000 m2
- Testing and training facilities.
- Canteen with small kitchen and shower rooms

### Management

The managing director has over 20 years experience in wind energy business and is well informed about the (Dutch) market.

We can help you with all kinds of questions.

### Have a pleasant stay

The old harbour of Harlingen is a very nice place to be.

There are nice hotels and good "Bed and Breakfast" facilities in the neighbourhood in an excellent price range.

### Price performance

Facilities can be rented at daily, monthly and projectbasis per m2.

We can offer you a very competitive price!
